The basic function of the program is to allow users to create and edit technical drawings, with additional functions used for designing and producing architectural work. In particular, it can be used to model and edit technical drawings. The ability to do this is useful in the electrical, mechanical, and architectural design industries. It has been estimated that in 2006, approximately 2% of all U.S. engineering work was AutoCAD-related. AutoCAD is available for macOS, Microsoft Windows, Linux, Android, iOS, and all versions of Mac OS X. In 2012, Autodesk rebranded their entire computer hardware business as 'AutoCAD'. History AutoCAD was originally developed by the DAS Design Division of Computer Design Corp. (CDC) of New York City, which had been renamed Computer Design Corp. (CDC) of Santa Monica, California, in 1983. The new company acquired computer manufacturer Digital Equipment Corporation (DEC) in September of that year, and renamed itself Autodesk. The application was originally developed on the PDP-10 minicomputer and was made available for DEC's PDP-11 minicomputer and VAX minicomputer. In March 1983, Autodesk launched AutoCAD on the PDP-11 minicomputer. The following year, AutoCAD was ported to the VAX family of computers. It was subsequently made available on VAX/VMS, ATS (Advanced Technology Systems) minicomputers, RCA Spectra and Topeka computers. In October 1985, Autodesk released an interactive form of AutoCAD called AutoCAD View Release 2.0 for the Macintoshes and introduced a graphical user interface (GUI) version for the VAX. This first GUI version of AutoCAD appeared on a VAXstation 3000. AutoCAD Rev 2.0 was the first release to include the ability to simultaneously model and edit drawings, and to support the concept of individual views of a design. The first release of AutoCAD was shipped on two floppy disks. The first release was known as AutoCAD Pro 1.0, and was developed to run on the PDP-11 minicomputer. The earliest release of AutoCAD was for the PDP-11. In 1985, AutoCAD was ported to the VAX-11/750, and was released for the Tops-20, Top

It has been demonstrated that the expression of certain host cytokines/chemokines, which regulate inflammatory and antimicrobial responses, is modulated by the oral pathogens. However, little information is available on the modulation of cytokine/chemokine expression in human oral cells by *Candida albicans*. Therefore, the objective of this study was to characterize the regulation of cytokine/chemokine expression by *C. albicans* in human gingival fibroblasts (HGFs). HGFs were infected with the wild-type strain (MYA3) of *C. albicans*, mutant strains of the adhesion protein (C1) or hyphal formation regulator (EFG1), or *C. albicans* cells pretreated with specific antibodies or conditioned medium of macrophages. In addition, HGFs were cocultured with macrophages and *C. albicans*. The messenger RNA expression of interleukin (IL)-1beta, IL-8, macrophage inflammatory protein (MIP)-1alpha, MIP-1beta, and regulated upon activation normal T cell expressed and secreted (RANTES) in HGFs was analyzed by reverse transcription-polymerase chain reaction.
