This is a small application for Windows XP/Vista, which displays your Excel files in a handy and easy-to-read format. ExcelToTXT also offers an "Export to pdf" function. The application is simply designed to show the contents of an Excel file, including the cell data, formulas, graphics, and formulas. You can easily export the data to plain text, or convert the file into a PDF format. All the document operations you would usually do in the program are available, such as the following actions: -Copy cell data (Ctrl+C), -Cut cell data (Ctrl+X), -Delete cell data (Ctrl+D), -Copy formulas, graphics, and formulas (Ctrl+G), -Paste cell data (Ctrl+V), -Copy formulas, graphics, and formulas (Ctrl+C), -Cut formulas, graphics, and formulas (Ctrl+X), -Delete formulas, graphics, and formulas (Ctrl+F), -Merge cell data (Ctrl+O), -Rename cell data (Ctrl+N), -Order cell data (Ctrl+S), -Format cell data (Ctrl+P). In addition to this, ExcelToTXT has a document viewer that allows you to view the documents in an XML format, as well as a Windows-based PDF viewer. It also offers a "Delete all cell data" function and an option to open the selected file directly. The U.S. Civil War was fought over many things: slavery, tariffs, the future of the Union. But one issue was a non-negotiable one for both sides: the North's claim of pre-emption. Under the Articles of Confederation, the Confederation Congress, by Article VI, reserved for the several states and not the Federal Government, certain prerogatives to the individual states and the issue became the subject of debate as the United States grew to encompass more and more of the American landscape. A federal law banning the importation of slaves came after the War of 1812 and imposed a ban on their sale within the nation, as well as on their importation from abroad. The Federal government also passed the Fugitive Slave Act, which required U.S. citizens to capture and return escaped slaves to the states from which they escaped. These acts were not something which the individual states felt were necessary for

Free Stocks Ticker is a lightweight Windows application designed with a single goal in mind: to help you display financial information from RSS feeds right on your screen. Easy-to-configure parameters The program automatically places a transparent panel on the bottom or top part of your screen and gives you the possibility to read the news directly from your desktop. Plus, if you hover the mouse cursor over one of the text messages, the tool provides additional information. You can set up the dedicated parameters by simply performing a right click-operation on the transparent bar and choose the desired function. Configuration settings Free Stocks Ticker enables you to make the program remain on top of other applications and this proves to be particularly useful especially when working with multiple programs, as well as alter the speed for the displaying mode (faster or slower). What's more, you can make the app display the RSS feeds randomly or in a certain order, reveal stock related data or news from CNN or Foxnews, and refresh the current information with just one click. Last but not least, you are allowed to specify the number of lines, set the font size, pick the background color, choose the line position (bottom or top), select the text color, alter the opacity, create a custom list with RSS feeds, and automatically refresh the feeds at a user-defined time. During our testing we have noticed that Free Stocks Ticker carries out a task quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not hampered. Bottom line All in all, Free Stocks Ticker offers a simple yet handy software solution when it comes to helping you monitor RSS feeds right from your screen.
